Subject: Microsoft Settlement

I think it is in the best interest of the United States to settle the Microsoft case immediately. I feel this case has hurt the economy and the millions of retirement accounts that hold Microsoft stock. The country has more important issues then to let this case drag on. In my opinion this legal case and a judge who has little knowledge of the hi tech industry should have been settled months ago.

I do find it interesting that the settlement requires Microsoft to give away hundreds of millions of dollars of there products. Isn't this why Microsoft was sued in the first place.
